

# Parents Maths

Warsztat matematyki dla rodziców

# Workshop

# Maths activities we do in Year 4

- Know all the times tables by heart up to  $12 \times 12$ , e.g. know facts like  $7 \times 5 =$  and division facts like  $36 \div 4 =$ .
- Round numbers like 672 to the nearest 10 or 100.
- Work out that a simple fraction like  $\frac{2}{6}$  is equivalent to  $\frac{1}{3}$ .
- Work out sums like  $26 + 58$  and  $62 - 37$  in their heads.
- Work out sums like  $234 + 479$  or  $791 - 223$  using pencil and paper and writing them in columns.
- Multiply numbers like 38 by 10 or by 100, and divide numbers like 4200 by 10 or by 100.
- Multiply and divide numbers up to 100 by 2, 3, 4 or 5, and find remainders, e.g.  $36 \times 3$ ,  $87 \div 4$ .

- Change pounds to pence and centimetres to metres, and vice versa, e.g. work out that £3.45 is the same as 345p, and that 3.5 metres is the same as 350 centimetres.
- Tell the time to the nearest minute and use a simple timetable.
- Pick out shapes with similar features, e.g. shapes with sides the same length, or with right angles, or symmetrical shapes.
- Use  $+$ ,  $-$ ,  $\times$ ,  $\div$  to solve problems and decide whether it is best to calculate in their head or on paper.
- To answer word problems and identify the calculation needed.
- To present data in a range of forms. Bar charts, tally charts and line graphs.

# Snaps from our album

- Each year, Maths becomes slightly more formalised.

However, during all of our lessons, children are able to access practical resources and this is encouraged throughout the school regardless of a child's age!

# Understanding number place value Hundreds, tens, ones, tenths and hundredths

**Money is an excellent resource to use at home and in school when thinking about number!**

# Addition and Subtraction

## Add and subtract 2 and 3 digit numbers

- including money, measures and decimals with different numbers of decimal places.
- The decimal point should be aligned in the same way as the other place value columns, and must be in the same column in the answer.
- Pupils should be able to add and subtract more than two values, carefully aligning place value columns.
- Children should:
- Understand the place value of tenths and hundredths and use this to align numbers with different numbers of decimal places.

£	2	3	.	5	9
+	£	7	.	5	5
<hr/>					
£	3		.		4

The decimal point should be aligned in the same way as the other place value columns, and must be in the same column in the answer.

# Dodawanie

## Different Addition strategies

Column Addition

Partitioning

Number lines

Handwritten column addition on grid paper. The first method shows  $47 + 25 = 72$  with a carry of 1 from the ones column to the tens column. The second method shows  $47 + 25 = 72$  by partitioning 25 into 20 and 5, adding 20 to 47 to get 67, and then adding 5 to get 72.

$$\begin{array}{r} 47 \\ + 25 \\ \hline 72 \end{array}$$
$$\begin{array}{r} 47 \\ + 20 \\ \hline 67 \\ + 5 \\ \hline 72 \end{array}$$

Handwritten partitioning strategy on grid paper. The equation  $47 + 25 = 72$  is shown at the top. Below it, the tens are added first:  $40 + 20 = 60$ . Then the ones are added:  $7 + 5 = 12$ . Finally, the results are combined:  $60 + 12 = 72$ .

$$47 + 25 = 72$$
$$40 + 20 = 60$$
$$7 + 5 = 12$$
$$60 + 12 = 72$$

1	9	.	0	1
	3	.	6	5
+	0	.	7	
<hr/>				
2	3	.	3	6

Pupils should be able to add more than two values, carefully aligning place value columns.

Say „6 tenths add 7 tenths“ to reinforce place value.

# Subtraction

## Odejmovanie

Column subtraction  
(with exchanging).

$$\begin{array}{r} 783 \\ - 35 \\ \hline 48 \end{array}$$
$$\begin{array}{r} 5263 \\ - 125 \\ \hline 138 \end{array}$$

Column Subtraction

$$£2.73 - £1.39 = £1.34$$

$\frac{1}{10}$      $\frac{1}{100}$

$$\begin{array}{r}
 £2.73 \\
 - £1.39 \\
 \hline
 £1.34
 \end{array}$$

Create lots of opportunities for subtracting and finding differences with money and measures.

# Multiplication

Mnożenie

We have been learning to multiply up to 2 digit number by 2 digit numbers. We have been using the grid method.

The image shows a handwritten calculation on grid paper illustrating the grid method for multiplication. At the top, the equation  $26 \times 4 = \underline{104}$  is written. Below it, arrows point from the digits 2 and 6 of the number 26 to the numbers 20 and 6 respectively. In the middle, a grid-based multiplication is shown:  $\begin{array}{r} \times 4 \\ 20 \quad \textcircled{80} \\ \hline 6 \quad \textcircled{24} \end{array}$ . The products 80 and 24 are circled in red. At the bottom, the addition  $80 + 24 = \underline{104}$  is written, showing how the partial products are summed to get the final result.

# Measuring

Mierzyć

We investigate kilogram, grams, litres and millilitres

The children were measuring and ordering items we find in the classroom.

# We make maths relevant!

**The children have been looking at different weights on household objects,**

How can I help my child with  
measuring weight?

**Cooking or baking with  
your child is a great  
way for them to  
experience weighing  
and measuring!**

# Measuring Length

erzyć

We use rulers to measure to the nearest  
mm

Find the difference between two lengths.

Estimate length

Begin to convert measurements

# Kształty płaskie i solidne 2D and 3D shapes

The children have been creating 3D shapes using polydron and creating a booklet all about their properties.

# Number facts

- Halving and doubling
- Factors
- Multiples
- Prime numbers
- Inverse

*Here the children had to ask their partner a doubling or halving question. Their partner had to answer before they caught the ball.*

# Loop cards

A fantastic way to speed up our mental math's skills.

# Decimals - Multiply Decimals: 10, 100, 1000

Question 1 of 10

Statistics

Evaluate:

$$0.9 \times 10 = \boxed{\phantom{00}}$$

Submit

# Decimals - Multiply Decimals: 10, 100, 1000

Question 1 of 10

Evaluate:  $1.4 \times 10 =$

tens	ones	tenths	
	1	.4	$\times 10$
1	4	.0	

When we multiply by 10, every figure moves one place to the left.

# My Awards

◀ Lifetime ▶

This Week's Points 143

- 1 Visit Bronze Cafe
- 0 Visit Silver Balcony
- 0 Visit Gold Computer

1000 Points in a week = 1 Bronze Certificate  
5 Bronze Certificates = 1 Silver Certificate  
4 Silver Certificates = 1 Gold Certificate  
Maximum 1 certificate per week

# Time

Czas

**Time – we have looked at analogue and digital clocks and telling the time on both.**

**Discuss the time with the children at home.....**

# Data Handling

# Word problems

**A yo-yo costs 65p. How many can you buy for £2?**

**How much change will there be?**

A bus seats 52 people. No standing is allowed.  
7 people get off a full bus. How many were left on?

How many people can sit on 6 buses?

Enjoy maths with  
your child!
